MEMORANDUM OF UNDERSTANDING
BETWEEN
THE PROGRAM MANAGER, SINGLE STOCK FUND
AND
THE PROGRAM MANAGER, GLOBAL COMBAT SUPPORT SYSTEM–ARMY

SUBJECT: Interim Integrated Materiel Management (IMM) Servers for the Global Combat Support System–Army (GCSS-Army)

1. Purpose: To delineate roles and responsibilities for the purchase, fielding, use, support and transition of interim IMM servers for GCSS-Army.

2. References:

    a. Memorandum of Understanding, PM SSF and PM, GCSS-Army, subject: Support for the Single Stock Fund Program Implementation, effective 15 December 1998.

    b. GCSS-Army Server Hardware Component Inventory (Draft), April 1999.

3. Scope: This memorandum of understanding encompasses actions by the PM, SSF and the PM, GCSS-Army to cooperate in the fielding of GCSS-Army IMM servers as specified below in this document.

4. Understandings, agreements, support, and resource needs:

    a. <u>The PM GCSS-Army, will</u>:

        (1) Specify non-development item (NDI) server hardware suitable for SSF Middleware requirements. This hardware is expected to be a scalable configuration that can be enhanced to meet the requirements of the GCSS-Army IMM server configuration when GCSS-Army is ready to field that module.

        (2) Purchase and deliver to the SSF Information Technology contractor (GRCI) up to 13 servers according to the timeline attached to this agreement. Support additional purchases (unknown at the time of this MOU) for SSF fielding to the Army National Guard, SOCOM, and other organizations with later fielding schedules.

        (3) Insure that the purchased hardware is covered by an on-site maintenance agreement.

        (4) Assist the SSF IT contractor in developing a plan to transition the management and operations of these servers from SSF fielding to the GCSS-Army sustainment mode of operations.

(5) Assist PM SSF in developing a spare systems/parts posture to support SSF during sustainment.

b. The PM, SSF will:

(1) Accept delivery and control of the GCSS-Army IMM servers according to the timeline attached to this agreement.
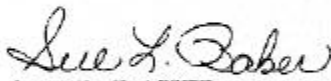

(2) Deploy and install the servers at the selected SSF locations according to the timeline attached to this agreement.

(3) Provide management and administration for the servers until they are transitioned to the GCSS-Army sustainment mode of operations.

c. Funding: Funding for the purchase, maintenance and sustainment of hardware will be the responsibility of PM GCSS-Army. Funding for software maintenance and administration during the period from receipt of the servers until transition to GCSS-Army sustainment will be the responsibility of PM SSF.

d. Miscellaneous: The server designated for the GCSS-Army (Vienna, Virginia) lab will serve as a "floater" to provide a COOP capability for SSF operations until the transition to GCSS-Army sustainment.

5. Effective date: This MOU will become effective when signed by both principals and will remain in effect until terminated.
